

Mobile Fume Hood Station

NEW!

MOBILE FUME HOOD STATION—A versatile fume hood that can be used in multiple classrooms. This ductless fume hood has an all-inclusive filter that handles liquids, gasses and solid chemicals. This unit is so flexible, it does not require ducting (saves energy) and plugs into an ordinary outlet. The fume hood part of the unit is enclosed by 5/16" thick acrylic so a teacher can demonstrate while students surround the hood. The metallic parts are anti-corrosion metallic alloy protected by a thermo-hardened anti-acid polymer coating. The hood internal dimensions are 30-1/4"W x 25-3/16"D x 35"H. Unit comes with a air flow meter, flow monitor, sampling port, programmable timer, energy ports, one filter and list of approved chemicals. An external light fixture can be added as an option. The fume hood is mounted to a 28"D x 32.375"W x 36"H oak cabinet. It provides an easy way to move the fume hood within a room or school. It rolls easily on 4" casters and has two drawers, one adjustable shelf and one pull-out shelf. Shelves and drawers are lined with chemical liner. The sides of the cabinet have a 19.5" handle that can be used to move the unit. Unit is finished in natural oak with an earth-friendly chemical resistant UV finish. (FOB Wisconsin, 54174)
